

# OZ<sup>3</sup> GEN

Providing O<sup>3</sup> Ozone Equipment and Complete Solutions

OZONE – O<sub>3</sub>

Ozone is a natural gas that we breathe daily. It is created when oxygen (O<sub>2</sub>) molecules are split into two separate atoms by ultra violet radiation from the sun, lightning, and electric arc. The freed atoms recombine in 3-atom groups to form cousins of oxygen: ozone (O<sub>3</sub>). The word ozone comes from the Greek word *ozein* meaning smell, because of its distinctive sun-ray lamp smell. Ozone is nature's way of cleaning pollution from our atmosphere.

## Car Unit

### Ozogen Car Unit

#### Specifications

Scientists claim that air indoors is generally more polluted than air outdoors sometimes to the magnitude of up to 1000 times more polluted.

It is a known fact that a huge amount of diseases are caused by indoor pollution.

Given that many of us spend around 2 hours daily traveling in our cars and a great portion of this in traffic breathing exhaust gasses, the above statements should be a huge concern to all of us.

The solution to polluted air in your car is a unit that fits directly into the car cigarette lighter plug and generates safe levels of Ozone to neutralize harmful air-borne particles and bacteria.

The Ozogen Car unit is exactly such a device.

This unit cleans air when you drive by emitting low concentrations of anions and ozone (O<sub>3</sub>) to sanitize the interior air of your car.

Input voltage: DC 12V
Rated power ≤1W
Negative ion ≥1.0×10 <sup>6</sup> ions/cm <sup>3</sup>
Ozone output: ≤0.05ppm
1,500 working hours
Size: 54mm (L) x 25mm (Dia)

- Small enough to fit under the flip-up panel
- Releases ozone (O<sub>3</sub>) to kill many airborne germs, bacteria and allergens
- Reduces odors, chemical presence and cigarette smoke through oxidation
- Keeping you more alert and on the go
- Stylish option to replace your car lighter with colours to match your car lighting
- No filter cost
- Maintenance free

#### Standard Available Units

Red	12v
Blue	12v
